

What did you learn from the seminar about "Futures of Education"

global citizen

We have to fight for our future

The importance of awareness

I have learnt that voicing your opinion on serious matters such as futures of education is not unfeasible.

awareness

new trends in education

I learned that the future of education is based on the right foundations.

I learned about the specific ways according to which education could be rendered qualitative in the post-COVID-19 era. In this framework, I also learned about the need for to education to combine theoretical and technological features.

That the ability to envision education can shape the future of humanity.

What did you learn from the seminar about "Futures of Education"

About the aim of this new project of UNESCO and how we can get involved and make our voice count

For the systematic evolution of women as teachers.

education is fundamental for shaping a global citizen

That education is concerned with everything and everyone: people, environment, social issues, economy, politics...everything is connected and affecting each other.

the importance of education in the 2030 Agenda and the term of global citizenship

I enriched my knowledge about UNESCO's initiatives for inclusive education and I saw for the first time concrete examples of how other local and international communities have acted towards UNESCO's educational goals.

The importance of taking action

There is an urgent need for participation. Nothing about us without us!

That it is important to preserve our uniqueness while respecting others and promoting intercultural dialogue.

What did you learn from the seminar about "Futures of Education"

The right to education

We learned that there are no limits in creative thinking, as well as team work always finds the way to boost our minds and improve our thoughts.

awareness for equal education

Education is a human rightA commodity that should be protectedTechnology should benefit educationEducation is the futurean abundance of futures for educationE

Learning never stops.

The importance of inclusive education

The importance of cooperation between actors and state for educating properly and substantially the future generations

I heard interesting methods and strategies of how to improve my teaching skills

Inclusion and equity are the foundations for quality education. Inclusive education respect all learners and their diverse needs, abilities and characteristics.

What did you learn from the seminar about "Futures of Education"

Basical definitions and significant actions which gave me the motivation to think and study of how education can transform life

I realized that without basic education all over the world, we can not but be utopians, and hope for the best with our fingers crossed

The global initiatives and actions that promote Education as Main Factor for Futures of Education. The Right to Public Education should be the strengthened public commitment to Education as a common good with the Particiapation/ Role of Youth .

The Role of the Unesco

The most important part was the exchange of views, through the discussion that took place with the participants, giving their own image and perspective of the challenges, education must face

Futures of Education can develop an open mind ready to achieve all the goals UNESCO has settled in order to create a better world in common.

From the seminar about -Futures of Education- i learn how important education is and the role it has in everyone lives. Also about the problems and the difficulties tha are empowered by the lack of education and many solutions to face this issue

Η εκπαίδευση είναι υπόθεση όλων μας και διαμορφώνεται μέσα από ευέλικτα μοντέλα επικοινωνίας.

What was the most interesting part of the seminar?

The information we have taken for UNESCO

The new schools tha made at underdeveloped countries

That there were many contributions and that it was interactive

The most interesting part of the seminar was the opportunity to hear different opinions on the topic of futures of education in very short time.

The most interesting topic of the seminar was that we talked about education and analyzed all aspects of it. This gave us the opportunity to train better.

Having the coording listen to each one of us and connecting us together with her insightful inputs. Under her guidance it seemed like in less than two hours we became a brilliant task force for the futures of education!

The presentations referring to the procedures of re-thinking and re-shaping education in the post-COVID-19 era.

the dialogue and the exchange of views with the participants

the chance to discuss about the possible aspects od education in future

What was the most interesting part of the seminar?

Hearing everyone's personal experience with educational goals and hands-on approaches in their local community. I was also inspired by everyone's enthusiastic ideas about how to improve inclusion in education.

aims of the UNESCO for education by the actions

The discussion we had in the end

Dialogue, we shared our thoughts from different perspectives

I really appreciated it when Ms Dilari shared with us her experience from Costa Rica

The part about what our country has already done and what will come up in the future

The interaction between attendees and the different opinions that were shared.

The constructive dialogue

The conversation among interns and Mrs Dilari

What was the most interesting part of the seminar?

The seminar with mrs Dilari.

The discussion!!

The education has been changed in many ways

It was an amazing experience . What i liked the most was the online webinars and the conversations .

the disucssions that were made

The Role of Youth to transforming and recovering Education, with energetic role and public discussion for the Futures of Education.

The space given to discuss and exchange our views

The most interesting thing was that we were given the opportunity to be heard and taken into account with our own views and not to end up with the conference being just informative

The most precious part of the seminar was the discussion we had with all the participants and the fact we realized that education , awareness and human rights have no borders. We have to act for a better and sustainable future for all!

What was the most interesting part of the seminar?

The most interesting part of the seminar was the interaction between all participants, additionally the creative conversation that showed each one's special way of thinking based on educators and interns cooperation.
